Ulrich Medical Strengthens Executive Management with International Technology and Innovation Expertise

Dr. Ulrike Tagscherer takes over as head of the Radiology Business Unit and will drive global growth and technological advancement.

As of November 2026, Dr. Ulrike Tagscherer has joined the executive management team at Ulrich Medical as Senior Vice President of Radiology. Effective January 1, 2027, she will assume leadership of the newly established Radiology Business Unit. Dr. Ulrike Tagscherer brings many years of international leadership experience in the high-tech industry. Her expertise encompasses strategic business development, innovation management, digital transformation, and the development of new business models. “With Dr. Ulrike Tagscherer, we are gaining an experienced leader who combines technological innovation with entrepreneurial thinking and international market expertise. This combination is a decisive factor for our continued strategic development,” says Friedrich von Rechteren, CEO and Chairman of the Executive Board of Ulrich Medical. “Together, we aim to accelerate global growth in the field of contrast agent injectors, tap into new technological potential, and sustainably strengthen our competitive position.”

Most recently, Dr. Ulrike Tagscherer served as Chief Innovation Officer at Kuka SE. Prior to that, she held various leadership positions at the Fraunhofer Society. With her cross-industry experience in the high-tech and robotics sectors as well as in digital transformation, Dr. Ulrike Tagscherer brings new perspectives to medical technology. Her appointment underscores Ulrich Medical’s strategic commitment to systematically developing its established business units, tapping into international growth potential, and actively shaping the future of medical technology.

About ulrich medical

The ulrich medical Group consists of the parent company ulrich GmbH & Co. KG and its subsidiaries in France, Spain, and the U.S. The internationally active group develops, manufactures, and distributes products for spinal surgery and radiology under the ulrich medical brand. Founded in 1912, this family-owned company employs over 680 people worldwide. While its products are used globally, the medical technology company is committed to "Made in Germany" quality, with the majority of development and manufacturing taking place in Germany. An additional development site in the U.S. strengthens the Group's international presence and creates the conditions for the successful positioning of our innovative solutions. In 2025, ulrich medical once again increased its revenue—for the 16th consecutive year—and, with this sustained growth, underscores its position as a reliable partner in the medical technology industry. In 2025, the company was honored with the German Brand Award and the Ulm Marketing Prize for its excellent brand strategy.
