

Breast cancer diagnostics with Max 2M™ and Max 3™

We have expanded the range of our user-friendly Max 2M and Max 3 injectors to include contrast-enhanced mammography. So now you can benefit from our proven advantages in this field as well:

Convenient

Injection start and all program steps can be carried out **quickly and patient-side directly on the injector**.

Thanks to the **compact device base**, there is still enough **space in the examination room**.

Efficient

The contrast media injector provides a **continuous flow of contrast media**.

The CM bolus is administered accurately, which **increases the quality of the imaging**.

The battery-operated injector can **be positioned freely and flexibly in the mammography room**.

dedicated to you.
