

# BOOST

your patient safety

*dedicated to you.*

# ulrich medical disposables – *designed to protect.*

**Disposables that make the difference.**

Not just disposables, but a key safety factor: developed, tested, and perfected for a reliable and safe workflow.

## Certified safety

The ulrich medical disposables are not mere accessories, but independently validated medical devices – tested in accordance with stringent regulatory requirements. For you, that means: **reliable performance and safety in clinical practice.**

## Precision thanks to coordinated system and sensor technology

The material properties, geometries, and tolerances are coordinated perfectly to the ulrich medical contrast media injectors. The result: **exact delivery volumes, error-minimized processes, and reliable diagnostics.**

## Clinically tested hygiene

From biocompatibility in accordance with ISO 10993 through to microbiological and virological testing: our disposables offer **proven protection** for your patients.

## Safety that improves with every update

Every product or software upgrade to our injection systems is accompanied by revalidation of the system's interaction with the disposables.

The advantage: **continuously verified safety** – throughout the entire device life cycle.

## Quality thanks to controlled manufacturing

Predominantly German manufacturing, combined with strictly monitored supply chains and processes, results in products that represent **safety, quality, and stability.**

## Full system performance. Full safety. Full services.

ulrich medical disposables ensure optimal system performance. At the same time, you benefit from a full warranty and full range of services while satisfying the increasing requirements on disposables.

In this way, we help you deliver contrast agents to your patients safely, efficiently, and precisely.

# BOOST your patient safety.

A person is lying on a white medical table inside an MRI scanner. The scanner's large circular opening is visible on the left. On the right side of the scanner, there are several control buttons: a red one at the top, a yellow one in the middle, and a grey one at the bottom. A large, semi-transparent blue circle is overlaid on the center of the image, containing white text. The overall scene is brightly lit, typical of a clinical setting.

**Disposables that protect.**

**Technology that fosters trust.**

**Safety that you can rely on.**
